## Qualitative Information, Financial Statements, and Other

### 1. Qualitative Information regarding Consolidated Operating Results

Throughout the first three quarters of fiscal 2009, the fiscal year ending May 31, 2010, an upswing in export activity and the positive effects of policies implemented by the Japanese government served to spur personal consumption. This in turn helped place the Japanese economy on a recovery trend. While the overall stimulus provided by capital investment remains weak, there are increasingly clear signs that the decline in domestic economic conditions has bottomed out.

Under these circumstances, the Toyo Denki Group is working in unison to realize the goals established under the “Challenge Up Plan,” the Group’s new medium-term management plan commenced in June 2009.

The Toyo Denki Group’s performance in the first three quarters of fiscal 2009, the first fiscal year of the new medium-term management plan, was as follows.

- (a) Orders received contracted 0.4% compared with the corresponding period of the previous fiscal year to 29,921 million yen. Despite an upswing in orders received for the period in the Transportation Systems and Information Systems segments, this overall result reflected the decrease in orders received in the Industrial Systems segment.
- (b) Net sales edged up 1.1% year on year to 23,624 million yen. Net sales for the period declined in the Industrial Systems segment. This was offset by improved net sales in the Transportation Systems and Information Systems segments.
- (c) From a profit perspective, the substantial drop in net sales in the Industrial Systems segment had a significant impact on the Group’s earnings performance. For the period under review, operating income totaled 108 million yen, a drop of 695 million yen compared with the corresponding period of the previous fiscal year. Ordinary income declined 603 million yen year on year to 116 million yen. For the nine-month period ended February 28, 2010, the Toyo Denki Group incurred a net loss of 211 million yen.

Results by business segment are provided as follows.

#### *Transportation Systems Segment*

Buoyed by large-scale orders for rail vehicle electrical equipment for the Beijing subway, orders received in the Transportation Systems segment increased 5.9% year on year to 21,268 million yen. Net sales in this segment climbed 10.3% compared with the corresponding period of the previous fiscal year to 15,185 million yen. This was attributable to firm overseas sales.

#### *Industrial Systems Segment*

Orders received in the Industrial Systems segment totaled 6,856 million yen. This year-on-year decline of 17.0% was mainly attributable to the slump in corporate-sector capital investment. For the same reasons as the drop in orders received, segment net sales contracted 25.8% year on year to 6,329 million yen.

#### *Information Systems Segment*

Reflecting steady contributions from IC card-compatible equipment relating particularly to railway station operations, orders received in the Information Systems segment increased 6.5% year on year to 1,797 million yen. Spurred by the delivery of the aforementioned equipment, segment net sales surged 99.0% compared with the corresponding period of the previous fiscal year to 2,108 million yen.

### 2. Qualitative Information regarding Consolidated Financial Position

Total assets as of February 28, 2010 stood at 35,076 million yen, an increase of 2,295 million yen compared with the end of the previous fiscal year. This was mainly attributable to an upswing in inventory of 1,654 million yen as well as other movements including an increase of 1,094 million yen in tangible fixed assets and an increase of 844 million yen in notes and accounts receivable–trade, and despite a decrease in cash and cash equivalents of 1,252 million yen.

Total liabilities amounted to 23,269 million yen, up 2,953 million yen compared with May 31, 2009. This reflected increases in short-term borrowings of 1,432 million yen and long term borrowings of 945 million yen, as well as other factors.

Net assets stood at 11,806 million yen, 657 million yen lower than the balance as of the previous fiscal year-end. Major movements were a 476 million yen decrease in retained earnings and a 93 million yen decrease in differences in evaluation of other marketable securities.

### 3. Qualitative Information regarding Forecasts for Consolidated Business Results

Looking at consolidated business results, net sales, operating income, ordinary income as well as the net loss for the first three quarters of fiscal 2009 are essentially in line with expectations.

A distinguishing feature of the Toyo Denki Group's business activities is the concentration of sales in the fourth quarter. Taking this factor into consideration, the Company has not undertaken to revise its full fiscal year forecasts of consolidated business results for fiscal 2009.

Notes:

1. Statements concerning financial results forecasts are based on data available as of the date of publication of this material and assumptions concerning the elements of uncertainty that will affect future business performance as of the date of publication of this material. Toyo Denki Seizo K.K. cautions readers that due to a variety of factors actual results may differ materially from forecasts.
2. Forward-looking statements contained in this material are the judgments of the Toyo Denki Group based on data available at the time of publication of this material. Such statements and descriptions are by no means comprehensive.

### 4. Other

- (1) Transfers of major subsidiaries during the period (transfers of specified subsidiaries accompanied by changes in the scope of consolidation):  
None

- (2) Application of the simplified method of accounting and accounting methods specific to the preparation of quarterly consolidated financial statements:

*Application of the simplified method of accounting*

*(The method for calculating corporate, local and enterprise taxes, deferred tax assets and deferred tax liabilities)*

In computing the amount of corporate, local, and enterprise taxes payable, the Company undertook certain additions and subtractions in conjunction with tax deductions with regard to important items only.

In determining the collectability of deferred tax assets, the same forecasts of results as well as the tax planning method used in the previous fiscal year are applied in the event that no significant change in operating and other conditions as well as temporary differences are confirmed since the end of the previous fiscal year.

- (3) Changes in accounting principles, procedures, and methods of presentation relating to the preparation of quarterly consolidated financial statements

*Changes in accordance with revisions to accounting standards and related practices*

*(Changes to the accounting standard for construction revenues and construction costs)*

Previously, the Toyo Denki Group had adopted the completed-contract method for recording construction revenues and construction costs. However, from the first quarter of the fiscal year ending May 31, 2010, the Toyo Denki Group has adopted the Accounting Standard for Construction Contracts (Accounting Standards Board of Japan (ASBJ) Statement No. 15 of December 27, 2007) and the Guidance on Accounting Standard for Construction Contracts (ASBJ Guidance No. 18 of December 27, 2007). As a result, for construction projects that commenced during the first three quarters of the period under review, those projects for which the outcome of the portion completed by February 28, 2010 can be reliably estimated are accounted for by the percentage-of-completion method (the rate of completion of the construction project estimated using the cost-comparison method), while other construction projects are accounted for by the completed-contract method.

Based on the aforementioned, net sales for the first three quarters of fiscal 2009 increased 1,275 million yen. For the period under review, operating income, ordinary income and net income before taxes each increased by 243 million yen.
